Course Evaluation

- A graduated, self-chosen Kaggle project, built up across the semester:
 - **Part 1 – Exploratory & Cluster Analysis:** data preprocessing/cleaning, exploratory analysis, theoretical description of the methods used, first results. Presented and consulted with the instructor in weeks 6–7.
 - **Part 2 – Classification/Regression:** full analysis using classification or regression methods, evaluation of results, hyperparameter tuning and cross-validation. Defended in weeks 11–12.
 - Dataset must be chosen by week 3; students may reuse/extend a bachelor-thesis dataset.
